

The Virtual Space Cardboard Virtual Reality

<https://thevirtual.space/>

Opening the Cardboard 2

Slide the Cardboard 2 out of its sleeve and remove the protective stickers from the lenses. Open the front flap, unfold the hood, flip the hood over and fasten the hood velcro connectors as shown in diagram 1:

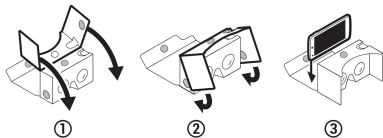

Diagram 1

Cardboard VR phone requirements

Android - Android phone with Android 4.1 or later, with a gyro sensor and magnetometer. To check for VR compatibility use the EZE VR app from Google Play.

iPhone - iPhone 5 or later with up to date iOS.

Configuring the smartphone

Android - Install the “Cardboard” app by Google from Google Play.

iPhone - Install the “Cardboard” app by Google from the App Store.

On starting the Cardboard app you will be prompted to scan the QR code below. The same QR code is on the Cardboard VR unit. Scan the QR code and the Cardboard app will configure your phone for the Cardboard 2 VR.

Viewer Profile QR Code

Cool VR apps for Android and iOS

VR photographs with “Cardboard Camera”

Virtual travel with “Street View”

**360° and 360° 3D videos with
“YouTube”**

**Educational field trips with
“Expeditions”**

Search on Google Play or the Apple App Store for “cardboard” or “VR” for more apps and games.

Have fun! :-D
